NEWS RELEASE

ROXMARK MINES APPOINTS EMMS MINE MANAGER TO SPEARHEAD MOLYBDENUM, GOLD PRODUCTION

Toronto, Ontario, May 11, 2005 — **Roxmark Mines Limited** today announced that, effective May 9, 2005, Stanley B. Emms has been appointed Mine Manager, with responsibility for the Company's gold and molybdenum mining activities.

A graduate of the Haileybury School of Mines with more than 22 years of experience in mining with major Canadian companies, Mr. Emms is well qualified to spearhead Roxmark's transition from exploration to gold and molybdenum production.

"We are very pleased to have attracted to our team a qualified leader of the calibre of Stan Emms," said Roxmark President David Malouf. "He has the credentials and the commitment to help assure that we achieve our ambitious objectives in 2005 and beyond."

As previously announced, Roxmark anticipates surface sampling and processing 6,000 tons of molybdenum ore and about 1,000 tons of gold ore in the Company's onsite mill this year to further evaluate the occurrences and generate cash flow to support ongoing activities.

The 2005 operating plan also involves large-core diamond drilling on its Nortoba-Tyson property to further delineate molybdenum deposits as a guide to driving a decline to enable bulk sampling and underground mining by the end of the year. The drilling will also assist Roxmark to evaluate promising high grade gold showings on the property.

About Roxmark

Roxmark Mines is a Canadian-based junior integrated gold mining company involved in exploration and development of gold and molybdenum properties in the Geraldton-Beardmore area of Northern Ontario. These properties include an important new molybdenum project, a fully-permitted mill, and six formerly highly productive gold mines which generated nearly two million ounces of production from high grade ore. Existing infrastructure above and below ground at these mines will provide important advantages in developing newly discovered parallel gold structures. Roxmark's common shares are listed for trading on the Canadian Trading and Quotation System Inc. ("CNQ") under the symbol RMKL. Further information is available at www.roxmark.com.

Forward-Looking Statements

This news release includes certain "forward-looking statements". All statements regarding exercise of warrants, potential mineralization, resources, exploration results, completion of program dates, amounts and future plans are forward-looking statements that involve risks and uncertainties including, but not limited to, political risk, title risk, commodity price and currency exchange risk, operating and

environmental hazards encountered in the mining business, general industry and economic conditions, change in regulatory requirements, future capital expenditures and the availability of financing. The results or events predicted in these forward-looking statements may differ materially from actual results or events. Historical results of operations and trends that may be inferred from the discussion and analysis may not necessarily indicate future results from operations.
