## NEWS RELEASE

### ROXMARK ANNOUNCES EARLY RESULTS IN NORTHERN EMPIRE DRILLING PROGRAM

**Toronto, Ontario, June 15, 2007.** Roxmark Mines Limited (TSXV – RMK) (CNQ – RMKL) today announced early and encouraging results from its drilling program in an area 700 – 912 metres east of the main shaft of the Northern Empire Mine near Beardmore, Ontario.

The 25-hole program is designed to define the extent of the Contact and Power Zones in a previously undeveloped area and to confirm the historical resources grading of 15g/t of gold (or 0.47 oz. Au/t for a total of 30,780 ounces of gold) as determined in 1999 by Peter Bevan, a consulting geologist. Drilling continues on the remaining holes and results to date confirm the previous resource assessment.

“These are early days in the drilling program, however, we are pleased that results appear, at a minimum, to confirm the historical information, which was our goal,” said Monir Younan, Roxmark President. “In addition, we have discovered an additional zone...and our anticipation is that grading will continue to improve as the drill rig moves further west.”

Results shown below are incomplete, as infill sampling is required in some places.

Section	Hole Number	From (m)	To (m)	Width (m)	Gold g/tonne	Infill required	Zone intersected	
912.5	07-24	65.20	65.48	0.28	4.63	Yes	Power	
		75.94	76.22	0.28	1.79	No	Contact	
900	07-23	33.60	34.05	0.45	2.40	Yes	New Zone	
		107.64	108.49	0.85	6.27	No	Power	
		122.50	122.59	0.09	0.08	No	Contact	
		07-22	63.70	64.30	0.60	3.22	Yes	Power
887.5	07-21	74.70	75.65	0.95	1.17	No	Contact	
		62.80	63.30	0.50	2.81	Yes	Power	
		72.00	72.75	0.75	3.12	No	Contact	
		or	72.00	73.55	1.55	2.15	No	Contact
		07-20 included	79.75	81.24	1.49	9.54	Yes	Power
862.5	07-19	80.09	81.24	1.15	12.00	No	Contact	
		90.75	91.54	0.79	7.52	No	Contact	
		57.87	59.44	1.57	1.60	Yes	Power	
		70.45	71.84	1.39	8.48	No	Contact	
		07-18 included	76.08	76.58	0.50	13.47	Yes	Power
		76.39	76.58	0.19	35.40	Yes	Power	
		86.95	87.08	0.13	11.80	Yes	Contact	

Results presented in this news release have been reviewed by the Qualified Person, Peter Bevan, P.Eng. The drilling program employs a Quality Assurance/Quality Control program consistent

with NI 43-101 and best industry practice. The NQ-sized core is logged, sampled and split. The samples are recorded, bagged and sent out to SGS Lakefield Research Limited. Samples are analyzed for gold by FAA methods. To date, some minor check sampling has been carried out and more is being planned, together with some blanks and two standards of gold ores.

### **About Roxmark Mines**

Roxmark Mines Limited is the leader in gold and molybdenum exploration and development in the historically significant Geraldton-Beardmore area of Northwest Ontario. In the last two years, Roxmark has generated cash flow from bulk-sampled gold and molybdenum processed at its fully-permitted mill and has the advantage of infrastructure from six formerly highly productive gold mines located on its properties. These mines previously produced nearly two million ounces of gold from high grade ore but were closed primarily due to dramatically lower gold prices at the time and to boundary issues, since eliminated.
