ROXMARK COMPLETES ANOTHER \$1 MILLION FLOW-THROUGH FINANCING WITH MINERALFIELDS GROUP

Toronto, Ontario, November 5, 2007. Roxmark Mines Limited (TSXV – RMK) (CNQ – RMKL) today announced the completion of a \$1 million non-brokered private placement financing with MineralFields Group of Toronto, a leading mining fund. This is the second Roxmark financing with MineralFields in 2007.

Gross proceeds of \$1 million were received in consideration of the issuance of 3,333,332 flow-through units at a price of \$0.30 per unit. Each unit consists of one common share and one common share purchase warrant of the Company issued on a “flow-through” basis. Each warrant entitles the holder to purchase one common share of the Company at a price of \$0.40 until November 2, 2008 and at \$0.55 thereafter until November 2, 2009. The warrants are subject to an accelerated expiry date under certain conditions. The securities issued pursuant to the financing are subject to a four-month hold period until March 3, 2008.

Roxmark paid finder’s fees to Limited Market Dealer Inc. in the amount of a cash commission of 5% of the proceeds and granted 333,333 non-transferable finder’s options, each exercisable at \$0.30 per option until November 2, 2009 to acquire a unit of securities of the Company comprised of one common share and one common share purchase warrant. Such common share purchase warrant shall be exercised on the same terms as the warrants issued under the offering.

Proceeds of the private placement will be used to fund the exploration and development program to advance Roxmark’s holdings of gold and molybdenum properties in the Geraldton-Beardmore mining camp in Northern Ontario.

About Roxmark Mines

Roxmark Mines Limited is the leader in gold and molybdenum exploration and development in the historically significant Geraldton-Beardmore area of Northwest Ontario. In the last two years, Roxmark has generated cash flow from bulk-sampled gold and molybdenum processed at its fully-permitted mill and has the advantage of infrastructure from six formerly highly productive gold mines located on its properties. These mines previously produced nearly two million ounces of gold from high grade ore but were closed primarily due to dramatically lower gold prices at the time and to boundary issues, since eliminated.
