ROXMARK COMPLETES SECOND TRANCHE OF FLOW-THROUGH FINANCING

Toronto, Ontario, December 24, 2007. **Roxmark Mines Limited** (TSXV – RMK) (CNQ – RMKL) announces the completion of the second and final tranche of non-brokered private placement financing.

The Second tranche consisted of 115,000 flow-through units were issued at a price of \$0.31 per unit for gross proceeds of \$35,650. Each unit consists of one common share and one warrant, issued on a “flow-through” basis. Each warrant entitles the holder to purchase one common share at a price of \$0.45 until December 24, 2008 and thereafter at \$0.55 until December 24, 2009, subject, in each case, to the right of Roxmark to accelerate the expiry date of the warrants under certain conditions. The securities issued pursuant to the financing are subject to a hold period expiring on April 25, 2008.

An aggregate of 3,911,500 units were issued in connection with the two closes of private placement for gross proceeds of \$1,212,565. Roxmark paid an aggregate cash finder’s fee in the amount of \$36,526 and granted an aggregate 188,520 non-transferable finder warrants to registered dealers and other persons permitted under applicable securities laws who acted as finders for the financing. Each finder warrant entitles the holder to purchase one common share at \$0.31 until December 14, 2009 and is subject to acceleration of expiry on the same terms as the warrants comprising part of the units.

Proceeds of the financing will be used to fund the exploration and development program to advance Roxmark’s holdings of the Northern Empire Gold Mine and the Nortoba gold and molybdenum property in the Beardmore mining camp in Northern Ontario.

The Northern Empire Mine was operated successfully by Newmont Mines from 1934 to 1941. The mine was serviced by a shaft to a depth of 2,460 feet and produced 149,000 ounces of gold from 426,000 tons of ore at a recovered grade of 0.35 oz/t Au. The on-site 200TPD mill (expandable to 500TPD) was built in 1982 and upgraded and permitted by Roxmark. It processed gold and molybdenum ores in 2005 and 2006, respectively.

About Roxmark Mines

Roxmark Mines Limited is the leader in gold and molybdenum exploration and development in the historically significant Geraldton-Beardmore area of Northwest Ontario. In the last two years, Roxmark has generated cash flow from bulk-sampled gold and molybdenum processed at its fully-

permitted mill and has the advantage of infrastructure from six formerly highly productive gold mines located on its properties. These mines previously produced nearly two million ounces of gold from high grade ore but were closed primarily due to dramatically lower gold prices at the time and to boundary issues, since eliminated.
